RE: Testing Results - Avery, Idaho Area

Dear Ms. Rolluda:

I appreciate your supplying me with the information on the testing of the wells at Avery Water and Sewer District and Avery Elementary School. My use of this information will be to decide if these two Public Drinking Water Systems are in compliance with the Phase II & V - SOC/VOC monitoring requirements under the Safe Drinking Water Act. The information from you to the Avery Water and Sewer District this spring indicated that approximately 150 compounds on EPA's Target Compound List were analyzed for in the samples taken August 26, 1992. I thought perhaps the Phase II & V contaminants may be part of these, but the information I received indicates otherwise.

If you think of any further information which may aid me in lessening the financial burden on these two systems, I would appreciate your assistance. I can be reached here at (208) 769-1422.

Thank you again for the information.

Sincerely,
IDAHO DIVISION OF ENVIRONMENTAL QUALITY

Lyle J. Misbach
